OBJECTIVE

Detail-oriented and motivated Computer Science undergraduate with strong foundational skills in front-end development and programming. Proficient in building responsive, user-focused websites and interactive applications using HTML, CSS, JavaScript, and modern tools. Skilled in real-time functionality, data handling, and clean UI/UX design. Passionate about problem-solving and continuously learning new technologies to enhance user experiences.

SKILLS

- React
- MongoDB
- C/C++
- JavaScript
- SQL
- Git
- HTML
- Java
- CSS
- Python

EDUCATION

2023 - 2027

SASTRA DEEMED
University, Tamil Nadu

B.Tech in Computer Science & Engineering

- CGPA : 7.69

2022-2023

Thamarai International
School, Thanjavur.

Higher Secondary Course -Second year

- Percentage : 76.6%

PROJECTS

1. Forkify — Online Recipe Application

A feature-rich recipe application that lets users search for recipes, view dynamic ingredient quantities based on servings, and manage their own personalized cookbook.

- Built real-time ingredient updates based on servings.
- Added recipe bookmarking with local storage for session persistence.
- Created an easy way to add custom recipes, shown first in search results.

Tech Stack: JavaScript (ES6+), HTML5, CSS3, Parcel, Forkify API, Local Storage

[Source Code](#)

2. Omnifood — AI-Based Food Delivery Landing Page

A modern, responsive landing page for a fictional AI-powered food delivery service, showcasing features like intelligent meal planning, fast delivery, and customer testimonials.

- Built fully responsive layout using modern HTML5 and CSS3.
- Designed clean UI/UX with visual hierarchy and mobile-first approach.
- Added interactive elements with JavaScript for smooth scrolling, mobile nav, and sticky header.

Tech Stack: JavaScript (ES6+), HTML5, CSS3
